P. J. Jansen, Director
Occupational Safety and Health and Environmental Compliance
McDonnell Douglas
P.O. Box 516
St. Louis, Missouri 63166-0516

Dear Mr. Jansen:

On March 29, 1990, the U.S. Environmental Protection Agency (EPA) promulgated the Toxicity Characteristic (TC) Rule. The TC Rule modified the toxicity characteristic by adding 25 new constituents. To continue on-site management of waste exhibiting the toxicity characteristic for the newly listed constituents, an existing interim status or permitted Treatment, Storage, or Disposal (TSD) facility was required to submit a revised Part A permit application and/or appropriate permit modification by September 25, 1990.

Your submittal, which consists of your Class I modification request for the St. Charles, Missouri facility, was dated September 24, 1990.

The Missouri Department of Natural Resources (MDNR) is responsible for the review of your submittal. Any questions regarding the technical review of your submittal should be addressed to:
